

Encircled Flux Data Format

Acceptance criteria are represented by the green box.

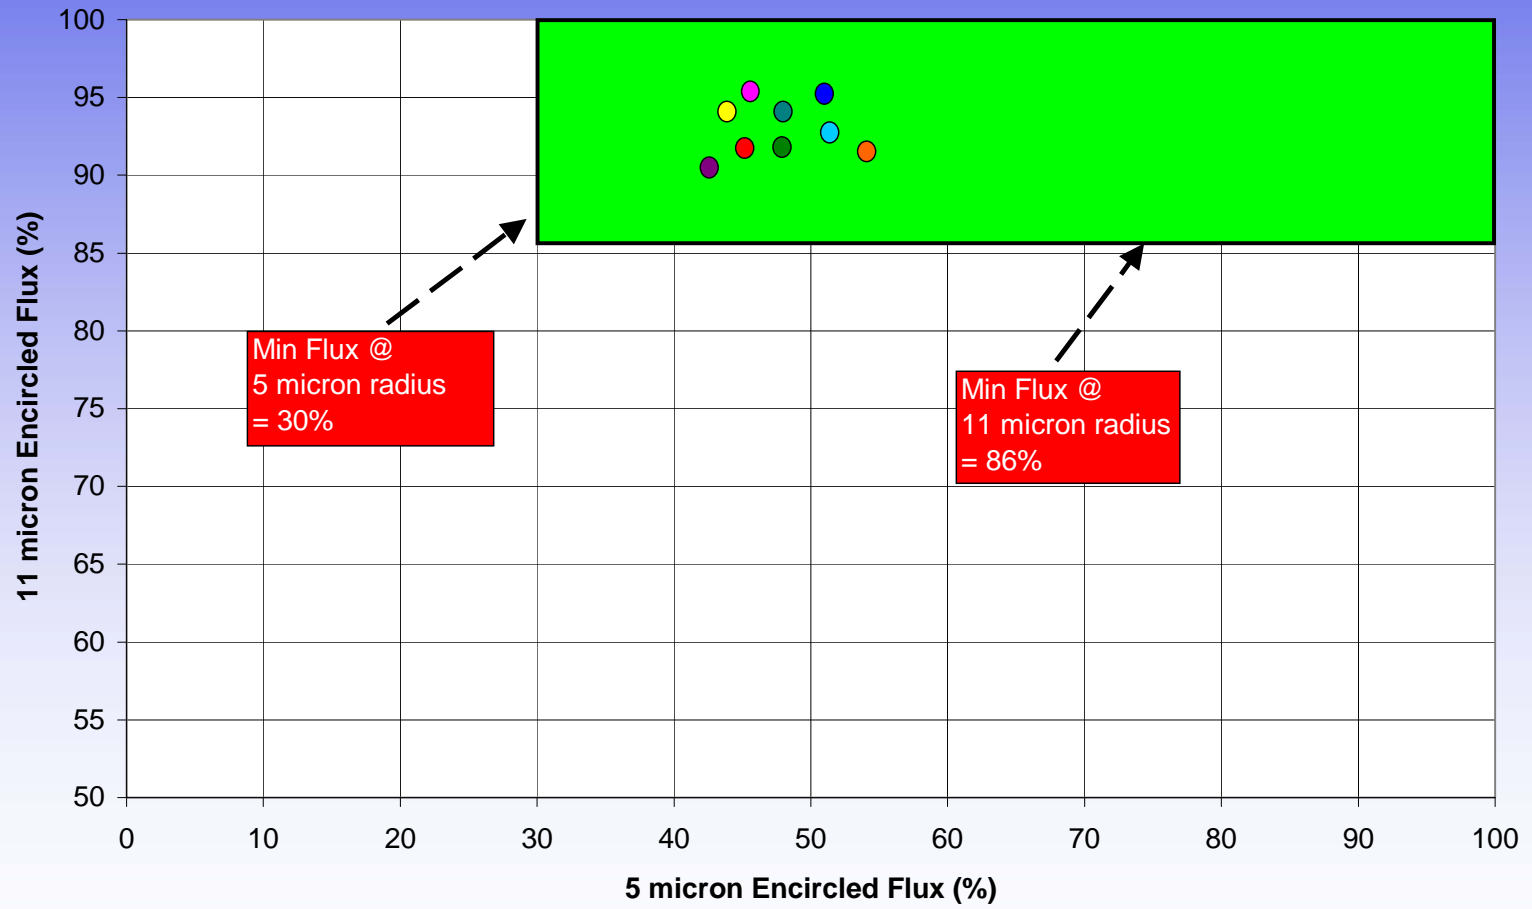

Each pair of encircled-flux data is shown as a point on the graph.

To pass the test, the point needs to be inside the green box.

Encircled Flux Data Format

Requirements for 10GBASE-LRM, 62.5/125 MMF

Encircled Flux Data Format

Requirements for 10GBASE-SR, 50/125 MMF
